

FRHS INDIA IN RAJASTHAN

Foundation for Reproductive Health Services India (FRHS India) initiated its operations in the state of Rajasthan with one district in 2011 and has been working closely with the Government of Rajasthan since then. Our endeavour is to improve access to affordable high quality sexual and reproductive health services among socially and economically vulnerable populations in the state. We currently provide a range of family planning services in 583 public sector sites in 26 districts of the state covering a population of over 59.7 million.

In 2020, following the nationwide lockdown since 25th March, most private and NGO healthcare providers had been non-functional in the state, for most of April. Only a few clinics provided safe abortion and post-abortion family planning services in April. Additionally, restrictions on mobility had resulted in reduced access to safe abortion services in Rajasthan.

As per our 'Policy Brief on Impact of COVID-19 on Family Planning', it was estimated that 1,677,296 clients would be unable to access contraception resulting in 204,301 unintended pregnancies, 71,682 unsafe abortions and 150 maternal deaths during the pandemic. With our advocacy efforts, safe abortion was listed as an 'essential service' during the lockdown, which helped the clients in the state to access the services. In spite of all the restrictions, we served 61,495 clients in the state through 14 Clinical Outreach Teams and 3 Clinics in 2020.

Our Service Delivery Channels

Clinical Outreach Team (COT)

A fully staffed and equipped team providing a full range (spacing, long-acting reversible and permanent methods) of family planning choices to clients in public sector sites.

Public Sector Support (PSS)

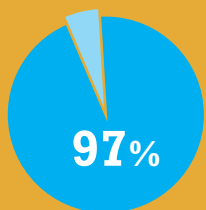

Improving choices and quality of family planning services for clients in identified public sector sites in Rajasthan.

Family Health Centres/Clinics

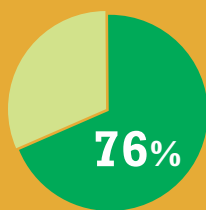

A one-stop facility offering an entire range of high quality family planning and reproductive health services in Ajmer, Jaipur and Banswara, for free, along with safe abortion services that are affordable.

CLIENTS SERVED IN 2020

59,801

Tubectomy clients served

567

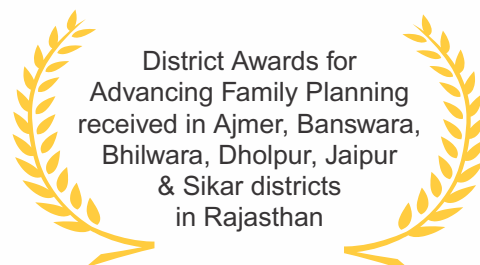

Intra Uterine Contraceptive Device (IUCD) clients served

533

Safe Abortions

AWARDS AND RECOGNITION

Turning the Tide

Client-centeredness is one of our core values, and it is non-negotiable when it comes to service delivery. We have often seen women come with their daughter-in-laws (DIL) to avail family planning services. But in Ajmer, during 'Unlock 1', we witnessed a comforting change, when Lakshmi (name changed), a 28-year-old DIL got her 41-year-old mother-in-law (MIL), Saroj (name changed) to FRHS India's Fixed Day Service (FDS) to avail sterilisation services.

Lakshmi had earlier availed tubal ligation in FRHS India's Ajmer clinic and was very satisfied with the services and quality of care. The change in tide left the service delivery

team with much cheer.

"Women at various reproductive ages need family planning, and when bahus manage to empower the older women in the families to take autonomous decisions on their reproductive choices, then things improve for the entire family", shared Saroj.

In the same FDS, we met Sarita (name changed) who got her DIL, Lata (name changed) to avail FRHS India's services. "I want the best and safest for her, and no other place like FRHS India. The teams here are very engaging, the counselling is very detailed, and the care is clearly visible", expressed Sarita.

OUR IMPACT IN 2020

747,614

Couple Years of Protection (CYPs) generated

31,881

Unintended Pregnancies averted

11,493

Unsafe Abortions averted

24
